

JobVibe Heuristic Evaluation

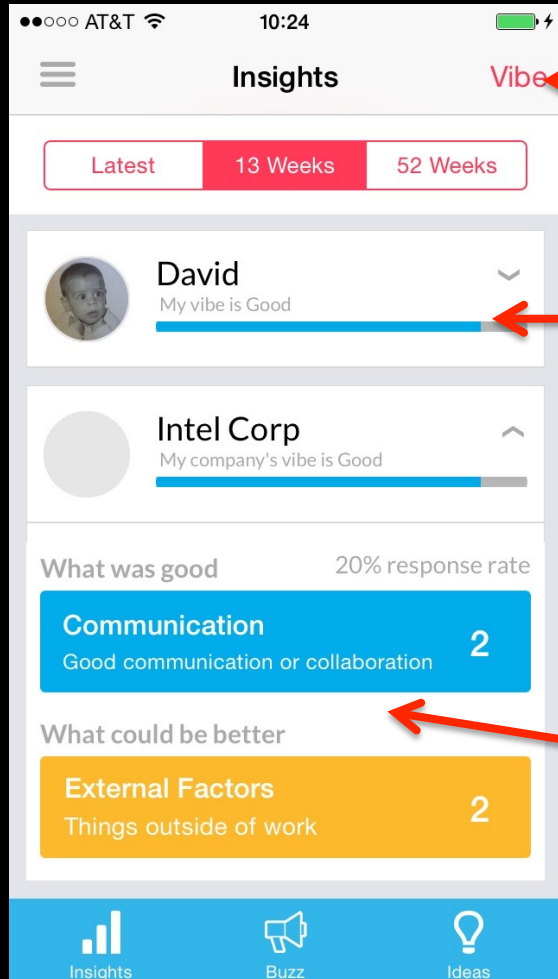

1. Things Done Well

1. Easy to use
2. Simple UI
3. Reminders
4. Great collaboration tools within the app

2. Opportunities

1. The reminder gets lost especially if I have a lot of notifications; Also, one of our team members didn't allow push notifications, so she was confused why she didn't get reminders to Vibe
2. No admin portal – it would be nice to be able to generate reports based on the data to show management.
3. No way to export data
4. No text fields to allow customized feedback – this could be critical to managers understanding any issues.

JobVibe Heuristic Evaluation

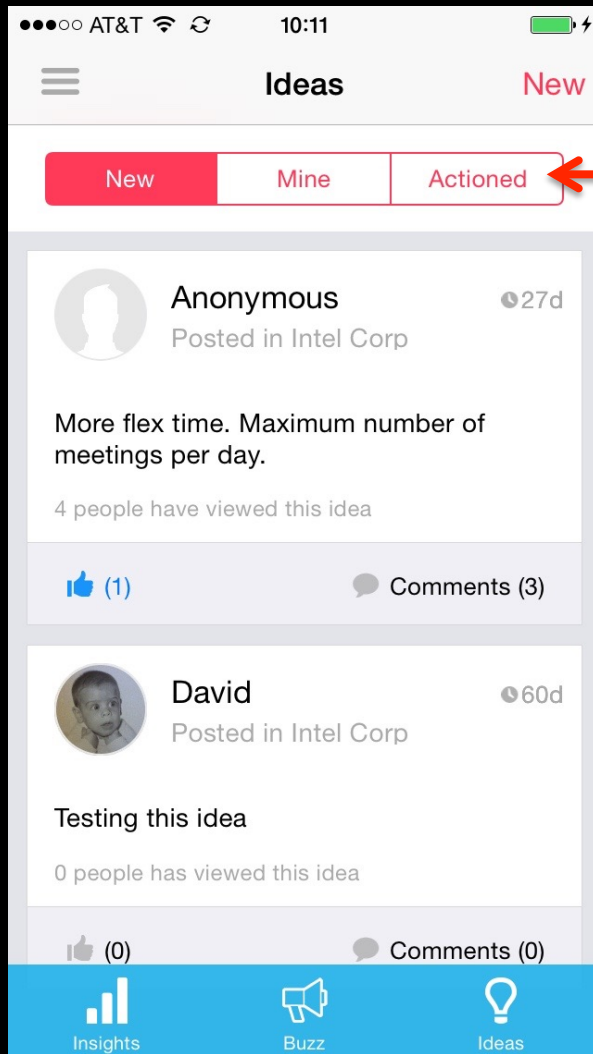

Perhaps disable the button if the Vibe is already taken for the week?

The scale is unclear here. If my vibe is good, why the bar chart?

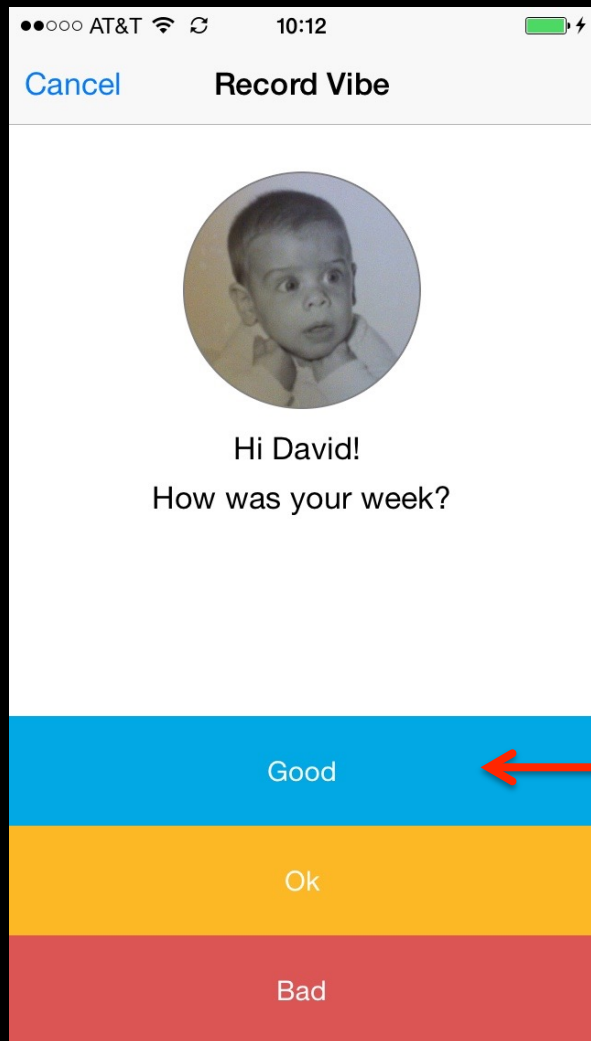

Could this section allow different visualizations? Maybe a line graph to show the sentiment over time?

JobVibe Heuristic Evaluation

I don't understand how "Actioned" is determined? Is this automatic?

JobVibe Heuristic Evaluation

The other two categories match the “traffic” light metaphor, Red and Yellow. To keep it unified, you might consider changing Good to green instead of blue.

Anything that was good?
Select up to 3 anonymous responses

Achievement
Achieved a lot

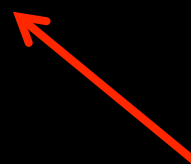

Energy
Good energy or activity

Communication
Good communication or collaboration

Direction
Good planning and realistic goals

Focus
Effective meetings or few disruptions

Support
Good support from people or systems

Can there be an “other” category where the user can add their own in here? Need the ability to customize for the way the customer works.

Thanks!
